Professional Experience

Raga AI **Freemont, CA**

Data Scientist Intern *Jan 2024 - Jul 2024*

- Co-developed the **open-source** framework Raga LLM Hub, enriching it with over 50 comprehensive **metrics** to evaluate **LLMs** and establish critical **guardrails** for LLMs and **Retrieval-Augmented Generation** (RAG) applications, enhancing **model evaluation** accuracy.
- Developed an **observability** tool RagaAI Catalyst to provide **trace** recording inside RAG applications, offering a one-click deployable solution that allows for **fine-tuning** and **evaluation** of LLM applications, streamlining deployment processes.
- Engineered "RAG Builder", a tool with **drag-and-drop** functionality that enables customizable **RAG components** construction and optimization for specific use cases, reducing development time for custom **RAG pipelines** by **50%**.

Raga AI **Bangalore, India**

Data Science Consultant *May 2022 – Aug 2022*

- Designed and deployed an API pipeline for interactive **visualization** and **clustering** of deep neural network embeddings using techniques like **t-SNE** and **PCA**, enabling real-time analysis and interpretation of high-dimensional data.
- Implemented **Chi-Squared**, Maximum Mean Discrepancy (**MMD**) and **Kolmogorov-Smirnov** tests for **drift detection** in image datasets, reducing undetected **data drift** and enhancing model stability.
- Leveraged **AE**, **VAE**, Variational Auto-Encoding Gaussian Mixture Model (**VAEGMM)** algorithms to identify outliers in high-dimensional datasets, improving **anomaly detection** accuracy by **40%**.

Askim Technologies **Mumbai, India**

Software Engineer *Jan 2021 – May 2022*

- Led the development of a multimedia prescription platform, creating a **python pipeline** that processed **high volumes** of paper prescriptions, significantly improving clarity, and reducing patient follow-up queries by **30%.**
- Built and deployed a resilient, **full-stack** application on **AWS** using the **MERN** stack, optimized for **scalability** and **security** with **multi-AZ** architecture, **HTTPS**-enabled **CRUD** endpoints.
- Crafted a robust **CI/CD** workflow using **GitHub Actions**, integrating **HashiCorp Packer** to automate the creation of latest Ubuntu-based **Amazon Machine Image (AMI)** for web applications, thereby facilitating continuous integration.
- Automated the provisioning of **AWS** services - **Route53, VPC, EC2, RDS, S3, SNS, Lambda, DynamoDB, IAM, CloudWatch** with **Pulumi** IaC.

United Phosphorous Limited **Mumbai, India**

Software Engineer Intern *Dec 2018 – Feb 2019*

- Created a custom **plant images** dataset with **annotations** and trained **object detection** model for detecting objects and their length.
- Applied **data augmentation** and **hyperparameter tuning** to enhance model **accuracy** to **96%** in real world scenarios, increasing efficiency of agronomists by **40%** and reduced human error by **50%.**

Publication

Dushyant M. et al. (2024). Roux-lette at Discharge Me! Reducing **EHR** (Electronic Health Record) Chart Burden with a Simple, Scalable, Clinician-Driven **AI** Approach. **23rd Workshop on Biomedical Natural Language Processing**, pages 719 - 723, Bangkok, Thailand. **ACL** (Association for Computational Linguistics). https://aclanthology.org/2024.bionlp-1.63/

Education

Northeastern University **Boston, MA**

Master of Science, Information Systems | ***GPA**: 3.63/4.00* *Sep 2022 – Dec 2024*

University of Mumbai **Mumbai, India**

Bachelor of Technology, Computer Science and Engineering *Aug 2015 – Oct 2020*

Technical Skills

Programming Languages: Python, Go, SQL, JS, HTML/CSS
Cloud & DevOps: AWS, Google Cloud, Azure, Docker, Pulumi, GitHub Actions, Linux, Packer
Databases: MySQL, PostgreSQL, MongoDB, DynamoDB, ChromaDB, Atlas Vector Search, Spark
Frameworks and Technologies: Langchain, LlamaIndex, Flask, OpenAI API, Ollama, Langsmith, PyTorch, Tensorflow, LLMs, Diffusers
